

HYDROLIFE

Inline Water Filter | Direct Connect to Refrigerators and Ice Makers: DC2FS

The Hydrolife DC2FS is a 5-stage in one filtration system designed for use with your fridge, water cooler or ice machine. Using GAC/KDF technology, the DC2FS will remove common contaminants found in tap water, leaving you with crystal clear ice cubes and the best tasting water from your fridge or water cooler.

Because of the filtration method use, the DC2FS will last longer than carbon only based fridge filter systems, lowering maintenance costs. The 0.5µm filter pads will remove any sediment larger than 0.5µm.

The DC2FS contains does not remove essential minerals such as potassium, calcium and magnesium, leaving you with excellent quality, great tasting, health water. Expected lifespan of up to 25,000 litres.
